

Dear Families,

Over the last few years you may have noticed some of the amazing growth in our wonderful school. Enrichment classes have been more popular than ever and we've seen this trend in after care, and in our morning classes with an extra four's section being added during the past two years. Our school is such a special place and we're thrilled that TSTI is thriving.

We've had great success with our new four's program, which was introduced this school year and runs from 9:00-1:30. While we will maintain the 9:00-12:00 day (with options to extend) for all age levels, we will be continuing the option to enroll four's students in a 9:00-1:30 class, and will introduce this opportunity to three's classes in the 2019-2020 school year. These classes will stay together with their teachers for the entirety of the school day, will eat lunch together every day, and will have enrichment built into their school day. We feel that this will allow children to make fewer transitions throughout the day, experience child-led enrichment, as well as build their stamina for a longer school day. Because TSTI prides itself on flexibility, we will continue to provide the option of a 9:00-12:00 class for families who prefer our existing structure.

As you begin to think about registration, whether for your incoming two's, three's, or four's child, please give thought to what structure will best fit the needs of your family and your child. Early registration will give us the opportunity to develop programming with a clear sense of what our families are looking for, and the chance to make our school even stronger. In order for us to run the extended 9:00-1:30 classes, we need to have a minimum of two classes of students enrolled at each age level, which will give us the ability to create classes that are the best fit for each child. Class lists and placements will be available to families in early August. Please feel free to reach out to us with any questions that arise.

Thank you,

Lauren Byers, TSTI Family Outreach Coordinator
